UNITED STATES POSTAL SERVICE INTERRUPTION and EMERGENCY IN THE STATE OF CALIFORNIA

A service interruption in United States Postal Service (USPS) in the State of California occurred on June 29, 1995, due to the action of the UNABOM bomber. The USPS will maintain heightened security procedures for mail originating in the State of California. These procedures will be in effect until further notice and are as follows:

Mail destined for California is not affected by these procedures.

For Express Mail, Priority Mail, First-Class Mail, international air mail and military mail items weighing less than 12 ounces, normal collection, distribution, and transportation will remain in effect.

Mail weighing 12 ounces or more which has been placed into California collection boxes will be returned to the sender. Postal Service window clerks will not accept Express Mail, Priority Mail, First-Class Mail, international air mail or military mail weighing 12 ounces or more.

Postal Service marketing and sales managers will work with known shippers to accept mail pieces weighing 12 ounces or more, but this mail will not be transported on scheduled passenger airlines.

Parcel post and international surface mail originating in California are not affected by these procedures.

The Patent and Trademark Office (PTO) is designating the interruption in the service of the USPS in the State of California caused by the UNABOM bomber as a postal service interruption and an emergency within the meaning of 35 U.S.C. 21(a). Any request to accept a paper or fee delayed by this emergency should be directed to Jeffrey V. Nase, Patent Legal Administrator, (703) 305-9285, PK1-520, for patent-related matters, and to Lynne G. Beresford, Trademark Legal Administrator, (703) 308-8900, 10B10 ST, for trademark-related matters.

SPECIAL BOXES FOR PATENT MAIL

Special box designations should be used to allow forwarding of particular types of mail to the appropriate areas as quickly as possible. Such mail is forwarded to the appropriate area without being opened. Only the specified type of document should be placed in an envelope addressed to one of these special boxes. Reference Collections of U.S. Patents and Trademarks
Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs have both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that preliminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.
